S1. Reproducibility Record

Item	Exact value
Repository commit	a288dd0f14786c93483e45524328726ab7b1b4ce
Checkpoint SHA-256	d15bf50a8615c8225ed48b51ea5cac673d82442ec0309036df555a053253afe0
Protocol	eth3d-overlap-aware-nested-v1
Source commits	delivery: 5ef68d3 · courtyard/cross-scene: ccb5487
Execution boundary	Saved outputs only; no model/checkpoint/CUDA execution

S2. Exact Frozen Frames

Scene	Set	Indices	Filenames

S3. Complete Runtime and Memory Results

Scene	Set	Views	Inference s	Total s	Allocated GiB	Reserved GiB
delivery_area	S2	2	0.906	3.208	5.261	5.883
delivery_area	S4	4	0.971	7.808	5.631	7.023
delivery_area	S6	6	0.853	10.712	6.084	8.074
delivery_area	S8	8	0.897	13.900	6.535	9.166
delivery_area	S10	10	1.142	17.386	6.599	9.230
courtyard	S2	2	0.876	4.510	5.261	5.883
courtyard	S4	4	0.713	7.614	5.631	7.023
courtyard	S6	6	0.727	10.858	6.084	8.074
courtyard	S8	8	0.974	14.496	6.535	9.166
courtyard	S10	10	1.055	18.645	6.599	9.230

S4. Complete Confidence and Geometry Results

Scene	Set	Depth mean	Depth median	Point mean	Point median	Retained	Path	Max sep.
delivery_area	S2	1.916	1.519	2.443	2.389	181300	0.534	0.534
delivery_area	S4	3.609	3.949	3.711	3.390	362600	0.741	0.741
delivery_area	S6	4.196	4.528	4.242	3.892	543900	0.770	0.770
delivery_area	S8	3.964	4.097	3.996	3.583	725200	0.831	0.831
delivery_area	S10	5.017	5.552	4.477	3.796	906499	0.748	0.747
courtyard	S2	2.319	2.516	3.034	2.931	181300	0.800	0.800
courtyard	S4	5.162	5.410	4.908	4.874	362600	0.894	0.893
courtyard	S6	6.535	6.832	5.591	5.488	543900	0.942	0.941
courtyard	S8	8.374	8.739	6.298	6.158	725199	0.927	0.926
courtyard	S10	8.012	8.372	6.151	6.019	906499	0.919	0.917

S5. Point-Cloud Rendering Parameters

Source: saved confidence-filtered ASCII PLY files. Deterministic sampling retained every fixed-stride vertex to approximately 45,000 points, followed by median centering and 97th-percentile radial normalization. Renders use a dark RGB(12,18,28) background, saved RGB point colors, two-pixel splats, perspective projection, a -12° elevation, and 80 evenly spaced azimuths. Animations are 960×640 at 10 fps for 8 seconds. Coordinates remain arbitrary and unaligned; normalization is visual, not geometric filtering intended to improve results.

Figure S1. delivery_area S10 rotation keyframes.

Figure S2. courtyard S10 rotation keyframes.

S6. Artifact and Build Record

Canonical inputs are `report/data/view_count_results.csv` and the source manifests/summary files recorded in `report/data/report_provenance.json`. V2 is regenerated with `scripts/build_v2_animations.py` and `scripts/build_phase10_report_v2.py`, then exported through Microsoft Word to selectable-text PDFs. The build imports neither VGGT nor Torch and does not load a checkpoint.

Digital animation files: `report/v2/animations/delivery_area_s10_rotation.gif/.mp4` and `courtyard_s10_rotation.gif/.mp4`. Main visual assets are under `report/v2/figures` and `report/v2/diagrams`.
